## 1 Description

This device is an implementation of the IEEE type PSS4C power system stabilizer model. This device is implemented as described in [1]. Implementation details can be viewed by inspecting the subcircuit of this device.

### 1.1 Pins

This device has 3 pins:

Pin name	Type	Description	Units
dw	Input	Speed deviation	pu
Pe	Input	Electrical power	pu
VST	Output	PSS output	pu

### 1.2 Parameters

The default set of parameters can be found in [1].

#### 1.2.1 Data tab

The parameters on the Data tab are:

1. **Gain  $K_{VL}$** : very low band gain
2. **Gain  $K_{VL1}$** : very low band differential filter gain
3. **Coefficient  $K_{VL11}$** : very low band first lead-lag block coefficient
4. **Time constant  $T_{VL1}$** : very low band numerator time constant
5. **Time constant  $T_{VL2}$** : very low band numerator time constant
6. **Time constant  $T_{VL3}$** : very low band numerator time constant
7. **Time constant  $T_{VL4}$** : very low band numerator time constant

8. **Time constant  $T_{VL5}$** : very low band numerator time constant
9. **Time constant  $T_{VL6}$** : very low band numerator time constant
10. **Gain  $K_{VL2}$** : very low band differential filter gain
11. **Coefficient  $K_{VL17}$** : very low band first lead-lag block coefficient
12. **Time constant  $T_{VL7}$** : very low band numerator time constant
13. **Time constant  $T_{VL8}$** : very low band numerator time constant
14. **Time constant  $T_{VL9}$** : vert low band numerator time constant
15. **Time constant  $T_{VL10}$** : very low band numerator time constant
16. **Time constant  $T_{VL11}$** : very low band numerator time constant
17. **Time constant  $T_{VL12}$** : very low band numerator time constant
18. **Very low band upper limit  $V_{VLmax}$** : very low band upper limit
19. **Very Low band lower limit  $V_{VLmin}$** : very low band lower limit
20. **Gain  $K_L$** : low band gain
21. **Gain  $K_{L1}$** : low band differential filter gain
22. **Coefficient  $K_{L11}$** : low band first lead-lag block coefficient
23. **Time constant  $T_{L1}$** : low band numerator time constant
24. **Time constant  $T_{L2}$** : low band numerator time constant
25. **Time constant  $T_{L3}$** : low band numerator time constant
26. **Time constant  $T_{L4}$** : low band numerator time constant
27. **Time constant  $T_{L5}$** : low band numerator time constant
28. **Time constant  $T_{L6}$** : low band numerator time constant
29. **Gain  $K_{L2}$** : low band differential filter gain
30. **Coefficient  $K_{L17}$** : low band first lead-lag block coefficient
31. **Time constant  $T_{L7}$** : low band numerator time constant
32. **Time constant  $T_{L8}$** : low band numerator time constant
33. **Time constant  $T_{L9}$** : low band numerator time constant
34. **Time constant  $T_{L10}$** : low band numerator time constant
35. **Time constant  $T_{L11}$** : low band numerator time constant
36. **Time constant  $T_{L12}$** : low band numerator time constant
37. **Low band upper limit  $V_{Lmax}$** : low band upper limit
38. **Low band lower limit  $V_{Lmin}$** : low band lower limit
39. **Gain  $K_I$** : intermediate band gain
40. **Gain  $K_{I1}$** : intermediate band differential filter gain
41. **Coefficient  $K_{I11}$** : intermediate band first lead-lag block coefficient
42. **Time constant  $T_{I1}$** : intermediate band numerator time constant
43. **Time constant  $T_{I2}$** : intermediate band numerator time constant
44. **Time constant  $T_{I3}$** : intermediate band numerator time constant
45. **Time constant  $T_{I4}$** : intermediate band numerator time constant
46. **Time constant  $T_{I5}$** : intermediate band numerator time constant
47. **Time constant  $T_{I6}$** : intermediate band numerator time constant
48. **Gain  $K_{I2}$** : intermediate band differential filter gain
49. **Coefficient  $K_{I17}$** : intermediate band first lead-lag block coefficient
50. **Time constant  $T_{I7}$** : intermediate band numerator time constant
51. **Time constant  $T_{I8}$** : intermediate band numerator time constant
52. **Time constant  $T_{I9}$** : intermediate band numerator time constant
53. **Time constant  $T_{I10}$** : intermediate band numerator time constant
54. **Time constant  $T_{I11}$** : intermediate band numerator time constant
55. **Time constant  $T_{I12}$** : intermediate band numerator time constant
56. **Low band upper limit  $V_{Imax}$** : intermediate band upper limit
57. **Low band lower limit  $V_{Imin}$** : intermediate band lower limit
58. **Gain  $K_H$** : high band gain
59. **Gain  $K_{H1}$** : high band differential filter gain
60. **Coefficient  $K_{H11}$** : high band first lead-lag block coefficient
61. **Time constant  $T_{H1}$** : high band numerator time constant
62. **Time constant  $T_{H2}$** : high band numerator time constant
63. **Time constant  $T_{H3}$** : high band numerator time constant

64. **Time constant  $T_{H4}$** : high band numerator time constant
65. **Time constant  $T_{H5}$** : high band numerator time constant
66. **Time constant  $T_{H6}$** : high band numerator time constant
67. **Gain  $K_{H2}$** : high band differential filter gain
68. **Coefficient  $K_{H17}$** : high band first lead-lag block coefficient
69. **Time constant  $T_{H7}$** : high band numerator time constant
70. **Time constant  $T_{H8}$** : high band numerator time constant
71. **Time constant  $T_{H9}$** : high band numerator time constant
72. **Time constant  $T_{H10}$** : high band numerator time constant
73. **Time constant  $T_{H11}$** : high band numerator time constant
74. **Time constant  $T_{H12}$** : high band numerator time constant
75. **Low band upper limit  $V_{Hmax}$** : high band upper limit
76. **Low band lower limit  $V_{Hmin}$** : high band lower limit
77. **Maximum PSS output  $V_{STMAX}$** : maximum PSS output
78. **Minimum PSS output  $V_{STMIN}$** : minimum PSS output
79. **Inertia constant  $H$** : Inertia constant
80. **Filter frequency  $W_{n1}$** : first notch filter frequency
81. **Filter bandwidth  $B_{W1}$** : first notch filter 3 dB bandwidth
82. **Filter frequency  $W_{n2}$** : second notch filter frequency
83. **Filter bandwidth  $B_{W2}$** : second notch filter 3 dB bandwidth

## 2 Initial conditions

The initial output signal is zero from the steady-state solution.
